West Virginia’s Economy: A Profile (it’s not good)

- **Low income, high poverty:** 49th in per capita income ($40,578 in 2018), 50th in median household income ($43,469 in 2017), 4th highest poverty rate (19.1% in 2017), and 1st in gov’t transfer payments as a share of personal income (27.9% in 2018).

- **Declining and aging population, low population density:** - 50k+ population (11’-18’), school enrollment -16k+ (08’-20’), labor force -30k+ (09’-18’), in-state public college enrollment -11k (11’-17’), and no cities above 50k.

- **Low Economic Diversity:** 46th in economic diversity (Hachman Index 2017), 5th in mining share of GDP and employment (11% in 2019-Q1; 3.9% in 2018), 1st in health care private employment share (21% - 2018) and 2nd in private health care GDP share (12.6% in 2019-Q1).

- **Low wages, education, participation:** 47th in median hourly wage ($16.94 in 2018), 50th lowest public sector wages (2018), 50th in share of adults w/ college degree (20.2% in 2018), and 50th in labor force participation (53.8% in 2018)

- **Poor health:** 49th in life expectancy (74.8 in 2017), 46th in overall health outcomes (United Health Foundation 2018), 1st in opioid related deaths (49.7 per 100k in 2017)
West Virginia’s Economy

A Profile (some good news)

West Virginia is a cheap place to live, but is it a great place to live?

The Relative Value of $100
What is the Real Value of $100 in Your State?

Notes: Numbers represent value of goods that $100 dollars can buy in each state compared to the national average. The Bureau of Economic Analysis has developed a methodology using Personal Consumption Expenditure and American Community Survey data to estimate average price levels in each state for household consumption, including rental housing costs. D.C.’s rank does not affect states’ ranks, but the figure in parentheses indicates where it would rank if included. Data is as of 2017.

What if family income grew at the same rate as West Virginia’s economy?

WV Median Income Growth vs Per Capita Income Growth, 1974-2017

Real Per Capita Income Growth: 91%
Real Median Income (4-person family) Growth: 30%
Broad-based growth in 1970s: 20%

WV Median 4-Person Family Income

Actual (2017): $73,337
Adjusted to Economic Growth (2017): $107,862

Problems with natural resource-based economies

The “vicious cycle” where high-wage and low-skilled jobs creates a disincentive to invest in innovation, higher education, advanced job skills, and other industries that results in less diversification of the economy.

Natural gas production climbing, prices falling...

1.8 trillion cubic feet in 2018
~ 84% Shale in 2017

16 of West Virginia’s top 20 occupations of 2026 pay below self-sufficient wages for a family of three.

**Pays LESS than Self-Sufficiency Standard for a Family of Three in 2016 ($36,513)**

**Pays MORE than Self-Sufficiency Standard for a Family of Three in 2016**

Source: WVCBP analysis of Workforce WV data (Long Term Occupational Projections, 2016-2026 + The Self-Sufficiency Standard for West Virginia, 2013)
Median wages are substantially higher in states with better-educated workers.

“An increase in the labor supply probably stimulates labor demand by at least two-thirds the supply increase. This is because additional labor attracts employers, and additional higher-skilled labor attracts employers with more skilled jobs” (Bartik 2009).

There was a much weaker correlation between education and wages as recently as 1979.

“We had a very different economy in the 1970s and the wage premium for a college degree (the gap between wages of college and high school graduates) was much smaller.”

- Berger and Fisher (2012)

**Relationship between state median hourly wage and share of state’s workforce with a bachelor’s degree or more education, 1979**

- Median hourly wage (2018 dollars)
- Share of workforce with a bachelor’s degree or more education
State Policies to Tackle Our Problems and Power Shared Prosperity in West Virginia

West Virginia’s biggest economic problems are: low wages, poor health, low educational attainment, and lack of economic diversity.
Impact of Raising Minimum Wage by $15 by 2024 in WV:
- 37.1% workforce get raise
- 244,000 workers impacted
- Total wages increase by $942 million
- Average wage increase: $3,900

Benefits of Raising Minimum Wage:
- Reduces poverty and public assistance
- Boosts consumer spending
- Saves labor costs due to reduced turnover
- Boosts productivity and sales
- Improves worker health
- Little negative impact on employment

Creating a West Virginia Earned Income Tax Credit

States with refundable* EITCs (25)
States with non-refundable EITCs (5)

Note: Refundability in Delaware is pending action by the state’s governor.
*Refundable EITCs give working households the full value of the credit they earn even if it

A paid family leave program in West Virginia offering up to 12 weeks of paid leave with a partial wage replacement of two-thirds of the worker’s usual weekly wage, with a maximum weekly benefit of $1,000, would cost approximately $102.3 million, including 5 percent administrative costs. This could be financed with a 0.36 percent payroll tax and would cost the average worker in West Virginia approximately $3.00 per week.

By keeping workers with caregiving needs attached to the workforce, paid family leave decreases reliance on public assistance and other government benefits which creates significant taxpayer savings.

Paid family leave has been shown to increase employee retention, lower turnover, boost productivity, and improve morale.

The Problem: The lack of access to paid sick days at work contributes to the spread of flu and other illnesses, exposes the public to diseases carried by sick workers in restaurants and nursing homes, results in workplace injuries and higher rates of job turnover, lowers productivity, makes it harder to balance work and family life, and prevents workers from staying home to care for a sick dependent.

Nearly half of West Virginia’s private sector workforce – 254,270 workers or 46.1 percent – lack paid sick days.

Businesses benefit from greater workforce stability, increased productivity, and lower health care costs.

Experiences in states has shown adopting a paid sick days law has not hurt profitability, employment, location decisions or discouraged new businesses.

Working sick costs the national economy $160 billion annually in lost productivity.

Child care costs increase dramatically with loss of child care subsidy

Expanding access to affordable quality child care would:

✓ Stimulate economic growth by boosting labor force participation (especially for single moms), employment rates, and educational attainment.
✓ Improves long-term child outcomes, such as social and emotional wellbeing.
✓ Help businesses thrive by improving retention, reducing turnover, and a more educated workforce.

“By laying the crucial groundwork for tomorrow’s workforce and promoting a strong workforce today, high-quality childcare provides a powerful two-generation approach to building the human capital that a prosperous and sustainable America requires.”

The U.S. Chamber of Commerce Foundation

Workforce of Today, Workforce of Tomorrow: The Business Case for High-Quality Child Care (June 21, 2017)

West Virginia: How Bright is Our Economic Future?
Local Earnings Effects of Skills Development Programs

**Ratio of Local Earnings Effects to Costs for Various Policies**

- **Comm College Workforce Ed**: 8.08
- **Universal pre-K**: 5.72
- **Public school spending increases**: 5.06
- **Child care for poor, birth to 4**: 3.31
- **Place-based college scholarship**: 2.13
- **Business tax incentives**: 1.56

**NOTE**: These ratios assume that programs are financed by increased taxes on the top 10 percent local income group, which, based on Zidar (2017), have no negative effects on local growth. Sources are specified in Bartik (2018b), except for community college workforce education. These numbers take the ratios for community college workforce education programs from Hollenbeck and Huang (2014) and multiply by 50 percent to account for migration.
